(1) American Income Life Insurance Company and National Income Life Insurance Company are statutory insurance subsidiaries of Globe Life Inc. and together represent primarily the American Income Life Division, as reported under GAAP. Globe Life's life insurance subsidiaries are required to file statutory financial statements with state insurance regulatory authorities. Accounting principles used to prepare these statutory financial statements differ from GAAP. For more information, please see *Note 2—Statutory Accounting* of the Company's Annual Report on Form 10-K.

(2) Collected premium represents collected direct statutory premium, excluding reinsurance. Considering the differences between the GAAP and statutory bases of accounting for earned premiums, collected direct statutory premium, excluding reinsurance, provides for a more complete comparison to GAAP reported premium and demonstrates the close relationship between the two figures. Collected direct statutory premium represents the premium collected on life and health policies during a given year and, as seen above, is comparable to the American Income Life Division's GAAP reported premium. The collected direct statutory premiums are reported on Line 95 of Schedule T of the respective company's Annual Statement.
